ABOUT US

BMG Stone and its subsidiaries are leading companies in the field of natural stones, mainly specialized in the extraction and manufacturing process of marble and granite materials. For more than a decade of development, we have been engaged in quarry mining, stone fabrication and export, domestic and overseas sales and installation service.

We continuously enlarge our materials range. Thus, raw blocks, slabs or different finished products are supplied as needed. We can get the ideal raw materials to satisfy all projects requirement with the most advanced processing technology, treating the materials and adapting them to the different designs and architectural needs.

Our professional trained staffs are ready to provide complete consultation and service on all your projects. Prefabricated stone products are available from our China factories. The members of our team is the main asset of our company because of their experience and specialization, working on large projects with architects and engineers in applying stone flooring, covering, facades or any other technical solutions. Our collaborative philosophy has generated excellent business relationships with many customers around world, this allows us to provide more materials upon requests, to offer complete, quick and effective solutions.

BMG Stone is your choice for the stone products and project needs. We are accepting the new partners and business owners to join us, we will always help you to obtain the projects and under budgets through our endeavored efforts.
